Subject: Request for Participation in System User Testing for the Capstone Project “AgriKlima: Localized Farming Aid for Farmers of District 3, Pampanga”

Good day!

We, **Ernz Danielle D. Manalo, Justine Jay A. Enriquez, and Kimberly G. Manaloto**, 4th year students of Bachelor of Science in Information Technology from the **University of the Assumption**, are currently conducting our capstone study entitled **“AgriKlima: Localized Farming Aid for Farmers of District 3, Pampanga.”**

The objective of our study is to **provide farmers with a digital tool that enhances their productivity and decision-making** by offering localized weather data, crop recommendations, and climate-aware farming insights.

As part of our research process and academic requirements, we are to conduct **user testing** to evaluate the **usability, functionality, and suitability** of our system. In this regard, we respectfully request the participation of a **representative from your municipality, preferably from the agricultural sector**, to serve as one of our **user testers**.

Your participation will greatly help us ensure that the system aligns with the needs of local farmers and that it delivers meaningful and practical outcomes. Moreover, this will contribute valuable insights to the refinement and validation of our project.

A **Certificate of User Testing** will also be provided to acknowledge your involvement and contribution to the success of our study.

We sincerely hope for your favorable consideration of this request. Should you have any inquiries, please do not hesitate to reach us at **edzmanalo.student@ua.edu.ph** or **09158158735**.

Thank you very much for your time and support in this academic endeavor.

Respectfully yours,

Ernz Danielle D. Manalo
